Experience

Open Source Contributor — Hacktoberfest

Remote

Software Engineer (Volunteer)

Oct 2025 – Nov 2025

- Submitted **4+ accepted pull requests**; collaborated with maintainers across teams of 5–10 contributors, maintaining async communication and technical documentation throughout the review cycle.
- Conducted code reviews and provided structured feedback to junior contributors, reducing PR merge timelines by **30%** and improving code quality across Python and JavaScript repositories.

Google Cloud Arcade Program — Legend Tier

Remote

Cloud Engineer (Program Participant)

Sep 2025 – Jan 2026

- Completed advanced GCP training in Cloud Computing, BigQuery, and Vertex AI, attaining the top **Legend tier**; led weekly knowledge-sharing sessions with **8+ peers** on cloud architecture concepts.

Projects

NotSoCold | *JavaScript, HTML/CSS, OpenAI API, Chrome Extensions, Express.js, Node.js*

GitHub

- Developed a **Chrome Extension** automating LinkedIn outreach by scraping recruiter profiles and generating **AI-personalized messages via OpenAI GPT API**, reducing manual drafting time by **80%**; adopted by **6 peers** in active job-search workflows.
- Architected an **Express.js** backend delivering context-aware messages for **10+ simultaneous targets** through a **zero-configuration popup UI** operable in under **5 seconds**.
- Shipped a job-search module generating **role-specific LinkedIn URLs for 10+ companies** in a single click, cutting job-hunt overhead by **60%**.

ASK M.I.R.A.G.E | *Python, Flask, LangChain, LLaMA, FAISS, SentenceTransformers, JavaScript*

GitHub — 60+ Stars

- Architected a **fully offline RAG pipeline** using LangChain + LLaMA for natural language querying over user-uploaded PDFs with **100% on-device processing**; led a **3-person team** from ideation to deployment using Agile sprints.
- Integrated **FAISS vector indexing** with SentenceTransformer embeddings, achieving **sub-second semantic search** across **100+ page** documents with zero external data transmission.
- Built a **RESTful Flask API** backend with a responsive frontend supporting **multi-turn conversational queries**, cutting document research time by **70%**.

Giggity | *JavaScript, HTML/CSS, Python, Firebase Realtime Database, REST API*

GitHub

- Built a **full-stack real-time chat application** on Firebase with live bi-directional messaging, end-to-end latency under **200ms**, and **5+ core UX features**; iterated on requirements from **5 users** and produced architectural documentation for contributor onboarding.

Certifications

- Google Cloud Associate Cloud Engineer** — Google Cloud Skills Boost, Advanced Badge Track
- Generative AI Fundamentals** — Google Cloud: Vertex AI, Prompt Design, LLM Fundamentals
- Full-Stack Web Development Bootcamp** — Udemy: JavaScript, Node.js, React.js, MongoDB
